Prerequisites

- docker and docker-compose installed on your machine.
- Node.js and npm installed on your machine.

Features

- User registration
- User login
- JWT authentication
- Protected routes
- Password hashing with bcryptjs

Prerequisites

- docker and docker-compose installed on your machine.
- Node.js and npm installed on your machine.
- MongoDB image will be pulled from [docker hub](#).

Set up

Navigate to backend directory

```
cd backend-data-bank
```

Core NestJS dependencies

```
npm install
```

React + vite: frontend directory

```
cd frontend-data-bank  
npm install
```

Run the following command to start the MongoDB container:

```
cd ..  
docker-compose up --build
```

Then enter <http://localhost:4000/login> to access the application.
